

# AUGUSTA WATER

## Job Description

<b>JOB TITLE:</b>	Class 4 Water Operator	<b>DATE:</b>	March 2024
<b>DEPARTMENT:</b>	Treatment Operations/Water	<b>FLSA:</b>	Non-Exempt
<b>REPORTS TO:</b>	Plant Supervisor	<b>CATEGORY:</b>	Essential

### SUMMARY OF RESPONSIBILITIES:

Perform routine tasks, necessary tests, and apply sound judgment based upon training and defined operations and maintenance practices related to the processing of water at treatment facilities and/or pump stations; does related work as required. Work is performed under the general supervision of the Plant Supervisor and/or Senior Operator of the Water Department.

### ESSENTIAL JOB FUNCTIONS:

1. Under supervision, assist with operating domestic water treatment systems including chemical and physical processes to gain knowledge.
2. May be assigned to operate any water facility process at Augusta Water, under supervision.
3. Conduct regular inspections of facility; observe process control parameters via SCADA, various instrumentation screens, and results of laboratory analyses; and anticipate and plan for flow changes and treatment system adjustments.
4. Respond to all alarms, failures, and process needs occurring at any water facility, under supervision.
5. Read meters and gauges, enter data in operational log and computer spreadsheets, and complete other permanent and temporary records and reports.
6. Observe operations of chemical feed systems, and replenish as needed, monitor and measure feed rates on a regular and timely basis, under supervision, adjust feed rates to meet treatment needs and operating permit goals and requirements.
7. Disassemble pipes, clear out pumps when clogged, change and clean strainer filters as needed.

8. Calibrate pH and turbidity meters.
9. Collect samples and perform analyses on water samples as scheduled and as needed. Collect and submit to central laboratory all required samples, interpret tests results and make corresponding treatment process changes where necessary, and conduct special tests as required by supervisor.
10. Under supervision, fill out required daily operational reports.
11. Inventory, track and deliver chemicals, equipment parts and supplies to facilities.
12. Check booster stations and clean filters.
13. Operate industrial equipment to haul chemicals and other materials.
14. Understand plant valving and piping systems. Under supervision of a Senior operator and/or Plant Supervisor, make changes to flow patterns as needed.
15. Perform preventive and minor maintenance on equipment and assist maintenance personnel as assigned. Respond to and diagnose maintenance problems with appropriate action. Communicate directly with maintenance personnel in the absence of the Senior Operator and Plant Supervisor.
16. Clean vehicles, perform general housekeeping and other building and grounds tasks as assigned.
17. Participate in operational discussions to further knowledge and understanding of the plants and process. Communicate with supervision and other operators on observations of the plants, processes, sample test results, and other observations.
18. Perform required safety checks as needed.
19. Assist with training new hires/trainees.
20. Perform duties and tasks in an environmentally friendly manner.
21. Perform duties in accordance with all local, state and federal laws, rules and guidelines.
22. Maintain effective working relationship with co-workers.
23. Remain aware of and adhere to personnel and safety policies and practices.
24. Perform other duties as required.
